PROFESSIONAL SUMMARY

Results-driven Agentic AI Developer, Engineer experienced in AI system, intelligence automation and cloud native full-stack development. Track record of building production-grade Digital FTE (AI Employee) solutions at national level hackathons — systems that autonomously handle real-world tasks 24/7 without human intervention.

Skilled in designing multi-channel integrations across Gmail, WhatsApp, and Web platforms, combined with event-driven microservices architecture. Proficient in the full development lifecycle — from spec-driven design and agent skill architecture to containerized deployment and CI/CD pipelines. Passionate about turning complex AI workflows into reliable, scalable products that deliver measurable impact.

EXPERIENCE

Freelance Digital Marketer, AI & Web Developer

2023 – Present

Transitioned from the textile industry to technology in April 2023, progressively building expertise in digital marketing, web development and artificial intelligence.

- Completed Certified Digital Marketing training from IDM Pakistan (2023-24)
- Currently advancing AI expertise through Governor Sindh Initiative for Artificial Intelligence and Computing (2024-Present). Building production-ready AI agents and web applications

Marketing Merchandiser

Feroze 1888 Mills

2019 - 2023

- Managed key global clients including LIDL, H&M, Li & Fung, and Pepco.
- Handled end-to-end order execution, sample development, and on-time shipment coordination.
